People & Ops Intelligence

For most companies, there is more data on their employees in the public domain than there is in internal HRIS/HCM systems.

We use cutting-edge techniques, including Machine Learning (ML), to acquire, process and analyse this data and we benchmark companies against their competitors.

Our people intelligence & benchmarking products include:

- [Employee sentiment & culture](#)
- [Headcount analytics](#) (available at whole company level or function deep-dives)
- [Skills & recruitment](#)
- [Salary Intelligence](#)
- [Tailored timeline \(people focus\)](#)

Understand the composition of a company's headcount by function, location and seniority.

Benchmark companies against their competitors to identify areas which appear over-indexed or under-indexed versus peer-set averages.
